OUR VERDICT

A cleaner that shows its work — and costs very little

Best value Disk cleaner

Hunter Disk Cleaner does one job and does it openly. Press Scan Drive and it lists each category — Temporary System Files, Windows Recycle Bin, Universal AppData Cache, Web Browser Cache for Chrome, Edge, Firefox, Brave and Opera, your Downloads folder and Orphaned Software Leftovers — with a clear label and the exact size, so you decide what goes. Browser cleaning removes cached files but not saved passwords, history or cookies, and the Downloads folder is flagged as your own data for manual review. It is fast, light, screen-reader compatible and translated into nine languages. The free edition from the Microsoft Store cleans browser caches and the Recycle Bin and shows the size of everything else; PRO unlocks the deep categories from just $12 for a year on up to five PCs, with no auto-renewal and a 60-day unconditional refund. For freeing space on a full drive, it is excellent value.

What we like

- **Full transparency.** Every category shows a label and exact size before anything is deleted.
- **Safe defaults.** Browser cleanup keeps passwords, history and cookies; Downloads is marked for review.
- **Free edition first.** Scan for free from the Microsoft Store and see what PRO would add.
- **Very low price.** $12 for a year on up to 5 PCs — and never an auto-renewal.
- **Accessible.** Screen-reader compatible (e.g. NVDA) and 9 interface languages.
- **Safe to try.** 60-day unconditional money-back guarantee.

Good to know

- **Cleanup only.** It frees disk space; it is not a PC optimiser, repair tool or antivirus.
- **Check the Downloads folder.** It contains your own files — review it before cleaning.
- **Time-limited options.** The $12 and $19 licences last 1 or 2 years; the $29 licence is one-time for 1 PC.
- **New offer.** Listed on Digistore24 since September 2026.
