OUR VERDICT

A focused toolkit for consistent, polished portraits

Pro pick
Portrait presets

Many preset packs are just colour filters. The Ultimate Pack goes further: alongside 16 scalable colour and black-and-white looks it includes 5 AI-enhanced portrait presets that use Lightroom's people masks to refine eyes, lips, skin and teeth separately, plus a vignette preset for framing. The base presets also set profiles, tone curves, sharpening, noise reduction and lens corrections, so one click gives you a complete starting edit that you can fine-tune. It is made by Boudoir Secrets Masterclass for portrait and boudoir photographers who want a consistent, magazine-style look across a whole gallery, and it is backed by a 60-day money-back guarantee. You need Adobe Lightroom (sold separately), and a recent version for the AI presets.

What we like

- **More than colour filters.** Profiles, tone curves, sharpening, noise reduction and lens corrections built in.
- **AI portrait presets.** Separate refinements for eyes, lips, skin and teeth using people masks.
- **Colour and B&W.** 16 scalable looks for bright, moody or timeless edits.
- **Consistent galleries.** Apply one look across a shoot and only fine-tune.
- **Works across Lightroom.** Classic, desktop and — via sync — mobile.
- **Safe to try.** One-time price and a 60-day money-back guarantee.

Good to know

- **Lightroom not included.** You need an Adobe Lightroom subscription or app.
- **Recent version for AI presets.** People masks need Lightroom Classic 12+ or Lightroom desktop 6+; older versions get only the base looks.
- **Presets are a starting point.** Light and skin tones differ — expect to adjust exposure and white balance.
- **Made for portraits.** Landscape or product photographers will get less from it.

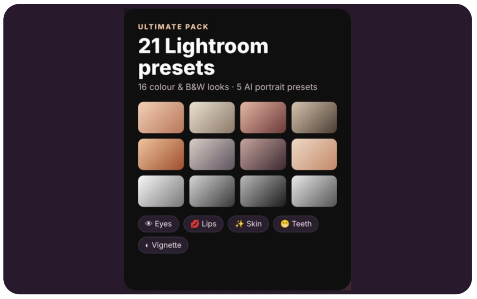
HOW IT WORKS

From raw photo to finished portrait

1

Import and choose a look

Install the presets once, then pick one of the 16 colour or black-and-white looks for the whole shoot.



2

Fix exposure and white balance

Presets cannot know your light. Adjust exposure, highlights and white balance so skin tones look right.

Exposure	−0.2 … +0.3
White balance	check skin
Highlights	protect
Noise	built in

3

Refine with AI portrait presets

Apply the eyes, lips, skin and teeth presets. Lightroom detects the person and creates the masks automatically.

Eyes	✓ mask
Lips	✓ mask
Skin	✓ mask
Teeth	✓ mask

4

Sync and export

Copy the settings to similar photos, add the vignette if you like, then export for screen or print.

Sync settings	whole set
Vignette	optional
Export	web / print
Look	consistent

HOW TO TRY IT

Try the pack risk-free in 4 steps

1
Check your Lightroom
Classic 12+ for AI presets.

2
Buy the pack
One-time, via Digistore24.

3
Re-edit a past shoot
Compare with your own edit.

4
Decide within 60 days
Keep it, or get a refund.

Your safety net: the seller offers a 60-day money-back guarantee — if you are not satisfied, contact their customer service or use the support link in your Digistore24 order e-mail within 60 days.

SETUP GUIDE

Setup guide: install the presets in Lightroom

Import once on your computer; the presets then sync to your other devices.

1 Check your Lightroom version

Help → System Info (Classic) or Help → About (Lightroom desktop). For the AI portrait presets you need Classic 12+ or Lightroom desktop 6+. Update through the Adobe Creative Cloud app if needed.

2 Buy and download

Check out through Digistore24 and download the pack from the order page or e-mail. Save the order e-mail for the 60-day guarantee.

3 Unzip the download

Extract the ZIP file to a folder you will keep, for example Pictures/Presets/Ultimate Pack.

4 Import in Lightroom Classic

Develop module → Presets panel → click “+” → Import Presets → select the preset files or the ZIP → Import. They appear as a new preset group.

💡 Lightroom Classic can import the ZIP directly — no need to unzip first.

5

Or import in Lightroom desktop

Edit (E) → Presets → "..." menu → Import Presets → choose the files. They sync automatically to Lightroom mobile and web with the same Adobe account.

6

Apply a look

Open a photo, hover over presets to preview, click one. Use the Amount slider (Lightroom desktop / newer Classic) to scale the strength.

7

Add the portrait presets

Apply the eyes, lips, skin and teeth presets. Lightroom detects the person and builds the masks — check them in the Masking panel and lower the amount if needed.

8

Sync and export

Select similar photos → Sync Settings (Classic) or copy/paste settings, then export for web or print.

OPTIONAL

Recommended workflow by shoot type

Starting points; adjust to your style.

Window-light sessions

1. Start with a **light colour** look.
2. Protect highlights on skin.
3. Skin preset at 50–70%.

Goal: soft, airy galleries.

Moody low light

1. Start with a deeper look.
2. Noise reduction first.
3. Add the vignette preset.

Goal: rich, dramatic tones.

Black & white

1. Pick a B&W preset.
2. Brighten skin with the Red/Orange mix.
3. Eyes preset for sparkle.

Goal: timeless portraits.

FAQ

Quick answers

What is the Lightroom Preset Ultimate Pack?

A pack of 21 Adobe Lightroom presets by Boudoir Secrets Masterclass: 16 colour and black-and-white presets, 5 AI-enhanced portrait presets and a vignette preset.

How much does it cost?

The Digistore24 order form showed €68.50 one-time when we checked; the final price can vary by country and tax.

Do I need Lightroom?

Yes. The presets work in Adobe Lightroom, which you buy separately.

Which Lightroom version do I need?

The colour and B&W presets work in current Lightroom versions. The AI portrait presets need people masks: Lightroom Classic 12 or later, or Lightroom desktop 6 or later.

Can I use the presets on my phone?

Yes. Import them in Lightroom desktop and they sync to Lightroom mobile with the same Adobe account.

What do the AI portrait presets do?

They use Lightroom's people masks to refine eyes, lips, skin and teeth separately.
