OUR VERDICT

A patient speaking partner in your pocket

Top pick language app

Speaking is the hardest part of learning a language, and the part most apps skip. LingChat is built around it: you chat or talk with AI characters — a teacher, a travel guide, a business professional — in role-plays and free conversation, and the app corrects your sentences, shows pronunciation, translates any word you tap and suggests a reply when you get stuck. You can also practise with real people in its community. Users on the app stores rate it 4.8 out of 5, according to the seller. With a 7-day free trial, a 60-day money-back guarantee and a yearly price of under $6 a month, it is an easy, low-risk way to add daily speaking practice to your learning.

What we like

- **Practise speaking any time.** AI partners are available 24/7 — no scheduling, no nerves.
- **Corrections as you go.** See your sentence corrected, with pronunciation shown above each word.
- **Never stuck for words.** Tap any word to look it up, translate a message or use “Help me reply”.
- **Real situations.** Role-play, shadowing practice and characters for teaching, travel and business.
- **Real people too.** Practise with native speakers and other learners in the community.
- **Easy, safe start.** 7-day free trial, a 60-day money-back guarantee and plans that cancel any time.

Good to know

- **It renews automatically.** Both plans renew until you cancel; cancel during the trial and you are not charged.
- **Use the same e-mail.** Your Pro membership is tied to the e-mail you enter at checkout.
- **Practice, not a full course.** Pair it with listening, reading and grammar study for steady progress.
- **AI is not perfect.** Some users mention speech recognition or translations that are not always exact.

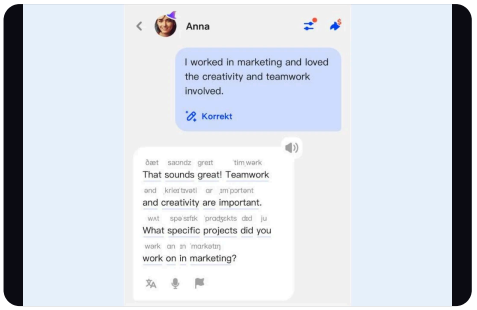
HOW IT WORKS

From your first “hello” to real conversations

1

Pick a partner and a situation

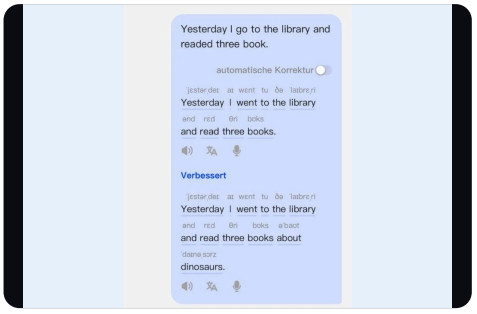
Choose an AI character — a patient teacher for beginners, a travel guide or a business professional — or start a role-play for a real situation like ordering food or a job interview.



2

Write or speak — and get corrected

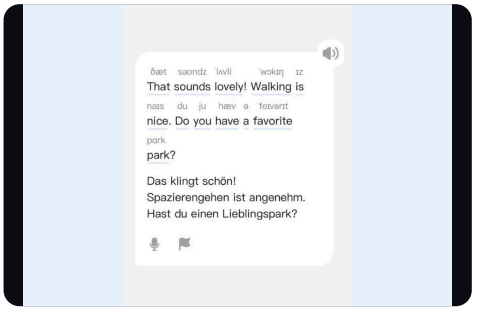
Type or say your answer. LingChat shows a corrected version with pronunciation, so you learn from every message. Switch on automatic correction if you like.



3

Tap, translate, understand

Tap any word to look it up, translate a whole message into your language and listen to it again as often as you need.



4

Stuck? Get a suggested reply

Use “Help me reply” for a natural answer with an explanation of why it works — then say it yourself to practise.

SETUP GUIDE

Getting started with LingChat

Setup takes about five minutes. The most important detail: use the same e-mail address everywhere.

1 Choose a plan and start the free trial

Pick **monthly ($9.99)** or **yearly ($69.99)** on the Digistore24 order form. Both start with a 7-day free trial.

- Enter the e-mail address you want to log in with — your Pro membership is bound to it.
- Note the date your trial ends; cancel before then if you decide not to continue.

2 Open the download links

After checkout you receive the **App Store** and **Google Play** links. Keep the Digistore24 order e-mail — it also has the cancellation and refund links.

3 Install the app

Install LingChat on your iPhone, iPad or Android phone or tablet. One account works on all your devices.

4 Sign in with the same e-mail

Open the app and sign in with the **e-mail you used at checkout**. Your Pro membership is activated automatically.

💡 Pro not showing? Check that you signed in with exactly the same e-mail, then contact the seller's support address on the sales page.

5

Set your languages

Choose your native language (for translations and explanations) and the language you want to learn, and set your level honestly so the AI matches it.

6

Pick an AI partner

Start with a patient teacher character if you are a beginner; try the travel or business characters and role-plays as you grow.

- Allow microphone access if you want to practise speaking out loud.

7

Use the help tools

Turn on **automatic correction**, tap any word for **lookup**, use **Translate** on difficult messages and **Help me reply** when you are stuck — then say the answer yourself.

- Try **shadowing practice** to work on pronunciation.

8

Build a daily habit

Practise 10–20 minutes a day, ideally at the same time. Add real people from the community once you feel confident.

- Decide before the trial ends whether to keep it — and remember the 60-day money-back guarantee after that.

OPTIONAL

A starting plan for your level
